

The paper key challenge

Original short paper-puzzle sample - no real locks or room setup

Puzzle A: Read the first letter of each word in order: Kite, Echo, Yarn. Write the three-letter key.

Key: _____

Puzzle B: Add the three tokens on the note: $2 + 3 + 5$. Write the result after the key.

Final code: _____

Facilitator guide

Planning example - timing is an estimate, not a measured session

Solution: KEY-10. First letters give K, E and Y. The three numbers total 10.

Suggested 10-minute outline: introduce the paper story for 2 minutes, allow 6 minutes for the two puzzles, then review for 2 minutes. Adjust after an actual organizer trial.

Hint ladder: first ask what each word starts with; then ask whether the number note requires adding all three tokens.

Reset checklist: remove written solutions, provide a fresh puzzle page, keep this answer page separate and explain that no physical access task is involved.

Original AI-assisted digital sample. No independent human facilitation trial, difficulty rating or event outcome is claimed.
